INFORMATION SECURITY MANAGEMENT SYSTEM UPON ISO 27001:2005 AWARENESS TRAINING COURSE (3-day course within 24 hours)

I. Objectives:

After the course, attendees will

- understand purposes and meaning of ISMS requirements upon ISO/IEC27001:2005.
- understand basic requirements/ clauses of the standard.
- initially identify and determine information assets of the organization where attendees are working for as well as preventive solutions, acceptance solutions and treatment for risks caused by security leak.
- be aware of preventive solutions and be able to set up security solutions for the organization where attendees are working at initial level.
- be aware of integration ability among ISMS upon ISO/IEC27001:2005 and other management systems.

II. Requirements for the course:

Objectives of the courses are only achieved when 03 following issues are satisfied.

1. Requirements for attendees:

- Attendees should be members of organizations which are being applying management systems upon international standards especially the ones who are working for organizations intending to establish and apply ISO/IEC 27001:2005.
- Attendees should be members of organizations which require data security, otherwise they should be members directly taking part in information security activities of their companies.
- Attendees should be fully present in classes, serious and active in all activities of each class.

2. Requirements for organizing courses

- Number of attendees for each course shall be 15 at minimum and 20 at maximum to meet the demand of international standards.
- Lecture room meets the demand of material facilities as requested by international standards i.e, the room is spacious, well-designed and clean; projector system, air-conditionings for summers, radiators for winters are well-equipped, desks and chairs are comfortable enough as requested by international standards.
- Tea breaks, lunch, mineral water for the whole course meet the demand of food safety and hygiene to ensure the good health for attendees during the course.
- ISO/IEC27001:2005 on ISMS is a new and difficult standard for understanding and application. Therefore, in order to enhance training quality and support attendees to reach the training objectives quickly, DAS Training Center set up a training model of *'theory must go together with practice'* where attendees will approach to several information security solutions basing on DAS office management.
- Training material is copious, well-prepared and selective.

D.A.S Certification Ltd.

- Training courses are organized professionally.
